

BREAKWATER X

BreakWater X™ is an advanced alloy-coated fabric built to withstand the harshest environments. Traditional PVC fabrics rely on plasticizers to make the PVC soft and flexible. Over time, these plasticizers migrate to the surface and are lost through evaporation or extraction resulting in ever-stiffer PVC that is prone to cracking and flaking. The alloy used to coat BreakWater X™ does not require plasticizers and therefore maintains a soft hand regardless of age or exposure.

Warranty: BreakWater X™ is covered by a 10-year limited warranty
