

ProLong™

Ticking that really fights time.

When a mattress is made of High Resiliency (HR) Foam, contact with vinyl ticking will eventually cause plasticizer migration and cracking.

For these mattresses, we at Bruin Plastics have developed ProLong™ with a unique polymer formulation that is distinctive in its ability to retard migration.

Even when exposed to caustic solvents and improperly mixed cleaning solutions, ProLong™ stays soft and resists any cracking.

Its color, Bruin Sand, reflects our commitment that it last - through the sands of time.

ProLong™ 10.5 oz.

Sand

IMPORTANT FEATURES

- Flame retardant
- Anti-static
- Fluid-proof
- Easily cleaned
- Non-allergenic
- Anti-bacterial
- Stain-resistant
- Self deodorizing
- Tear-resistant

FLAME RETARDANCY
